

LASSO: CONNECTING INTERDISCIPLINARY RESEARCHERS

Ryan Mork

Genevieve Shattow

PIRE Hackathon 2015

Finding an interdisciplinary researcher should be as easy as a Google search

1. Connect young faculty needing to take risks
2. Connect data scientists to long-tail researchers
3. Provide an objective collaborator metadata service

THE RENAISSANCE SCIENTIST IS DEAD

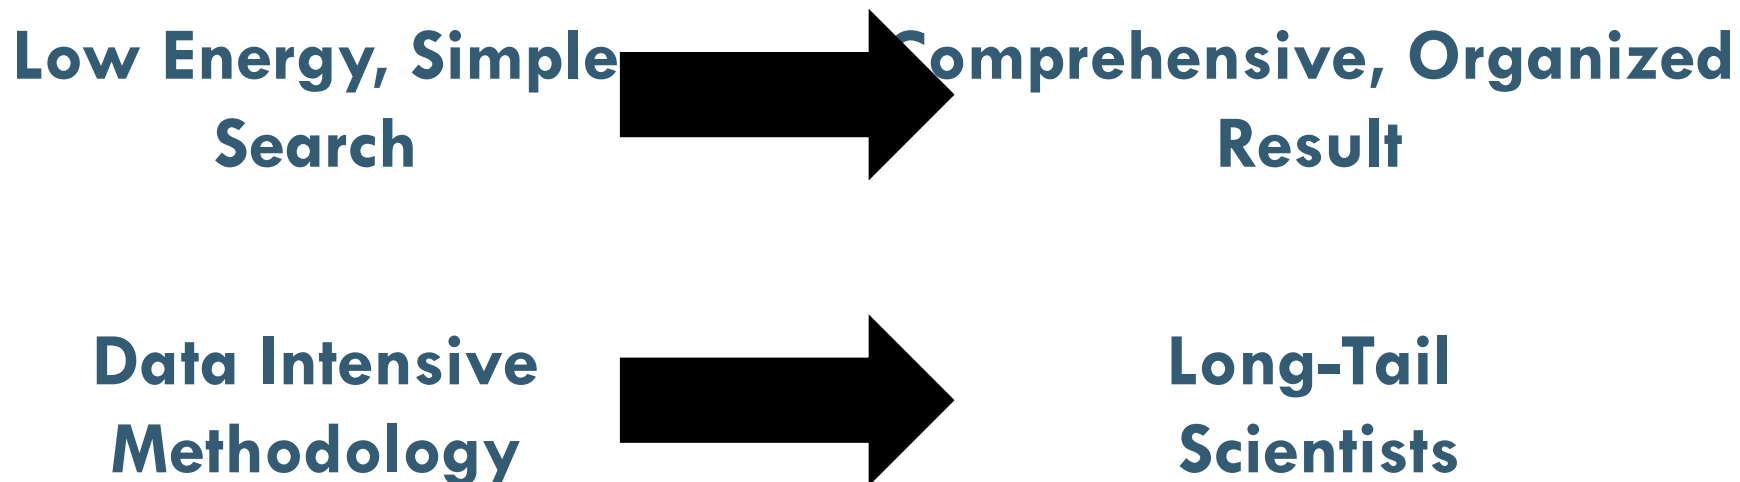

One person, one *lab*, can no longer do everything

1. Tough Questions, Tougher Methods
2. Modern methods require modern statistical analysis for quality results
3. Connect Data to Data Scientists Through Data Commons

BRINGING A 'DATA PERSPECTIVE' TO SCIENTISTS

Focus on 'Hooking' scientists to new ideas requiring minimal user input

BEYOND A KEYWORD SEARCH: AGGREGATION AND METADATA

User Inputs

Scientific Background and
Interests

User Name,
Institution

Process

Expanded Keyword
searches
